XA701 DOOR AND WINDOW ALARM with chime option

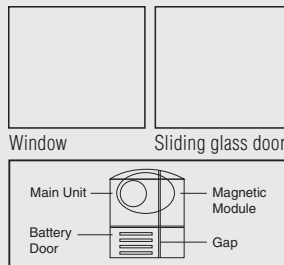

Installation

Apply double sided adhesive tape (included) to the backside of the main unit and magnetic module. Mount to window, door or cabinet opening, aligning main unit with magnetic module so gap between main unit and magnetic module is less than 12mm (1/2 inch).

Operation

Arming the Alarm

Switch the unit to "ALARM" or "CHIME" position. When a protected window, door or cabinet is opened, the alarm or chime will sound immediately and continuously until disarmed.

Note:

3 times chime triggered everytime turning to CHIME position from either OFF or ALARM. It indicates the function begins.

Disarming the Alarm

Switch the unit to "OFF" position or, stop siren automatically when protected window, door, or cabinet is closed.
